About AIMS

We are proud in the knowledge that our customers become long term and repeat customers due to our commitment in providing the highest quality equipment and services. Customers also become pleasantly surprised when they discover that we are still here to assist them years after they have purchased equipment from us, for any help or advice that they need.

Unlike other companies we are not just a sales office, AIMS has an active R&D department as well as our manufacturing department. Our team use their technical expertise to create unique solutions for our customers.

We are also a leader in the field of developing and supplying operators and laser cutting machines and now the AIMS SFS for brake presses. We have been recognized by the industry in providing engineering excellence.

The AIMS Sheet Following System (SFS) provides support for your metal sheets during the folding process on your brake press.

Strange & Dahl
Consulting Solutions

Dear Mr. Graham,

A letterhead is the heading at the top of a sheet of letter paper (stationery). That heading usually consists of a name and an address, and a logo or corporate design, and sometimes a background pattern.

The term "letterhead" is often used to refer to the whole sheet imprinted with such a heading. Many companies and individuals prefer to create a letterhead template in a word processor or other software application. This generally includes the same information as pre-printed stationery but without the additional costs involved. Letterhead can then be printed on stationery (or plain paper) as needed on a local output device or sent electronically.

That heading usually consists of a name and an address, and a logo or corporate design, and sometimes a background pattern. The term "letterhead" is often used to refer to the whole sheet imprinted with such a heading.

Sincerely,

Luis Stall
Director
